

## IF YOU HAVE A INCORRECT VEHICLE ERROR 1027 USE THIS PROCEDURE TO RETURN TO STOCK

Steps you can take with vehicles getting error 1027. This has work for me with FW149 and Fw155 on 3 vehicles now.

1. Program vehicle return to stock
2. This will return vehicle to stock- **Hit Select**
3. Match vehicle turn key on- **Leave the key in off position, hit select**
4. ECU is powering down turn key off- **It should still be in off position, hit select.**
5. Unlocking ECU
6. Please wait key should be on-**Turn key on at this time.**

It will start downloading stock to vehicle.

Thanks,

**Brett Lundquist - SCT Tech Support**
